New Drivedata digital recorder

Drivedata, the UK's leading independent designer and manufacturer of professional video and data recording systems, has launched a new Digital Video Recorder - the Drivedata DR2 for the motorcycle market.

The Drivedata DR2 Video Recorder system uses solid state recorder technology and has MPG/AVI recording capability at the maximum resolution of 720 x 576 at 25fps. The DR2 also includes the option to record in two formats – MPEG4 for web applications and video streaming and MPEG2 for DVD and Broadcast applications - as used by Sky, ITV, BBC and Men & Motors.

John Chambers, Managing Director of Drivedata comments, “The DR2 is a technically advanced product that provides outstanding value for money. We have focused on developing a product that our customers know will perform consistently in harsh and extreme environments and is competitively priced.”

The DR2 Digital Video Recorder can record directly onto a compact flashcard. It can be used in a variety of motorcycle, automotive, autosport, aqua and other extreme sports applications and can also be bundled with an extensive range of cameras, camera mounts, remote controls and other accessories.

The product is available via selected stockists or via the www.drivedata.com website or by calling 08707 60 70 44.
